Overview
Welcome to Historical concepts and skills resource.
This resource is designed to assist you to:

- implement the history strand of the Human Society and its Environment Key Learning Area using the Board of Studies NSW History K-6 Syllabus
- understand the difference between historical concepts and skills
- recognise the implications of the historical concepts and skills continuums in enhancing student achievement
- utilise the historical concepts and skills to provide quality teaching in Human Society and its Environment K-6 lessons for history to support students’ engagement and understanding of the procedures, tools and methods of thinking which constitute the discipline of history.

Rationale
The history K-10 syllabus provides a description of historical concepts and skills for each stage of learning. This is collated into a continuum of learning.
This resource supports teachers to understand the increasing sophistication of historical concepts and skills and role its implementation has to achieve the outcomes of the history K-10 syllabus.

**Historical concepts**

**Why are historical concepts and skills important?**

Historical knowledge and understanding requires mastery of the procedures, tools and methods of thinking that constitutes the discipline of history. *Shape of the Australian Curriculum: History* (page 6)

History is a specific discipline with its own methods and procedures. It is much more than the simple presentation of facts and dates from the past. History provides the concepts and skills for students to answer the question, ‘How do we know?’ Teachers need to apply the concepts and skills described in the syllabus to develop the lessons which support the syllabus outcomes using the content described in the syllabus.

In the teaching of history there should not be an artificial separation of content and process or a focus on historical method at the expense of historical knowledge. Concepts and skills support the development of historical understandings that enable students to make sense of the past and support them to think ‘historically’.

**What are historical concepts?**

The Board of Studies NSW History K-10 Syllabus describes 5 specific key historical concepts K-10: change and continuity, cause and effect, perspectives, empathetic understanding and significance. The more difficult concept: contestability, is added for stages 3, 4 and 5. These key historical concepts are developed across a continuum of learning K-10.

The *continuum of concepts* in the history K-10 syllabus supports teachers to differentiate student learning in history, by referring to the description of each concept for higher or lower stages of learning to meet the learning needs of specific students.
The following explanations of the key historical concepts enhance understanding and include some classroom examples.

The Shape of the Australian Curriculum: History. This section provides a description of historical concepts.

Watch the video of Dr Kay Carroll explaining the historical concepts for K-6 included in the History K-10 syllabus. The transcript is also provided.

Explore the history concepts continuum; select at least one of the sequencing activities.

**Historical concepts in practice**

The activities are designed to engage you in clarifying your own understanding of the key historical concepts, and to enhance the application of these concepts with your students.

Watch the RINSO soap powder commercial *Then came happiness (1931)* from Australia Screen.

Use the recording sheet to examine and annotate how the historical concepts described in the syllabus are portrayed in the RINSO advertisement.

(Copied under PtVB)
**Historical concepts in context**

View the *Rinso Soap Powder: Then came happiness (1931)*. Consider the way the historical concepts are portrayed in this historical source. Record the context for considering each of the historical concepts below.

</table>
Contestability

The syllabus introduces contestability in Stage 3. Contestability is about debating how we represent the past. History, by its nature, is open-ended, as historical explanations are provisional and often debatable. Involving students in debate is important in refining moral judgement as they come to terms with multiple perspectives, assess the trustworthiness of these perspectives and provide informed accounts of the past based on evidence. Contestability provides a context for drawing students into enjoying history and is a key component in developing deeper historical understanding.

Refer back to the advertisement to examine the concept of contestability. In the advertisement, what aspects of the characters are accurate portrayals of family life in 1931; how do you know? The education notes for this clip provide some additional insight.

Transcript: Dr Kay Carroll – Historical concepts

The historical concepts described in the new syllabus are predominantly some that we’ve done in the past in terms of the primary teaching. The major one I think is the change in continuity. And we’re all very familiar with that but that’s really, really important in terms of history. What has actually changed? And why has it changed? And that’s really powerful. What are some of the forces that have changed? And how has it remained the same over time? And why might that be significant or important? And that leads into another sort of concept, we’re talking about here is causation and comprehending both short and long term causes, the effects and thinking about the multiple causes that can create a particular situation. We’re also talking here about the use of empathy. That’s a really important one for the new syllabus. And that literally means walking in the shoes of somebody else. And I think that’s a very powerful question that students need to grapple with. Well, why did this happen? And why didn’t they choose to do this? And why didn’t they respond in this way? And until they have a really good, textured understanding of a particular context and what was happening at the time and the social fabric, they’re not often able to answer those sorts of questions.

So, dealing with empathy is another important concept that the new syllabus brings to us. And so these are the areas that I guess are really important. And the last one is significance. So, what does this tell us? Why is it important and to what extent? And children from very early stages can grapple over time with these big concepts of history and they’re really important and the foundation starts in the new syllabus from early Stage 1 and grows over time in a developmental model all the way through to Stage 3.
Examine the K-10 history concepts continuum in full, or reference on Page 20 of the Board of Studies NSW History K-6 Syllabus. Evaluate how the descriptions can enhance learning about history for your students.

Reference the HTAA web site to explore how the key historical concepts can be applied to different stages of learning.

Concepts in practice – primary
Examine the 'ideas in a nutshell' provided for each concept across the primary years. Consider how you would address the key historical concepts with your students.

The impact of students’ prior experiences
Young Australians come to school from different backgrounds that are shaped by different family and community narratives. These influences continue to operate as they progress through school. (Shape of the Australian Curriculum: History, page 4)

Read Pages 13 and 14 from this document about Children’s ability to learn history.

Discuss or reflect upon:
- Why are historical concepts important for students K-6?
- How do historical concepts support students' deep understanding of history?
- What teaching and learning opportunities ensure student engagement with historical concepts?
Why do you need to develop historical skills with students?

Historical skills are integral to the discipline of history. Historical skills are required to engage in historical inquiry.

What are historical skills?

The historical skills of comprehension, chronology, terms and concepts; analysis and use of sources; perspectives and interpretations; empathetic interpretation, research and explanation and communication are described for each stage of learning in the history K-10 syllabus.

*History is a disciplined process of inquiry into the past that helps to explain how people, events and forces from the past have shaped our world.*
(from the Board of Studies NSW History K-10 Syllabus Rationale)

To acquire a knowledge and understanding of history, skills associated with the identification, comprehension and interpretation of sources, use of chronology, and research and communication need to be developed. Historical skills are developed through a process of historical inquiry.

*(Shape of the Australian Curriculum: History page 7)*

These key skills enable students to engage with history and to explore, discover, inquire and most importantly to ‘experience’ history.

Skills in history are to be taught using the content described in the syllabus for each stage of learning.

View Dr Kay Carroll’s explanation of the historical skills in the History K-10 Syllabus. The transcript is also provided.

Read about the Historical Skills and their application in practice for primary schools.
Explore the continuum of skills in history by selecting at least one of the sequencing activities below. You need to click and drag correct responses.

Examine the K-10 history skills continuum for the primary stages of learning or reference on Page 21 of the Board of Studies NSW History K-6 Syllabus. Evaluate how the skills descriptions can enhance learning about history for your students.

Skills in practice – primary
Examine the ‘ideas in a nutshell’ provided for each skill across the primary years. Consider how you would improve your students’ use of historical skills.

View the video clip: The mad minute – the Boffin, the Builder and the Bombardier. (10:01)

(Copied under PtVB)

Use the recording sheet Historical skills evident in the video to analyse how the three characters use historical skills. Record your responses and then compare with the notes provided.
Transcript: Dr Kay Carroll – Historical skills

We have historical concepts which are overarching important concepts that are taught throughout the Stages 1, 2 and 3. But, in order to I guess allow students to see those concepts and how they fit together we need to actually be teaching historical skills. And these skills enable the students to engage with history, to manipulate, to look at things, to experience history. And the main historical skills that students will be grappling with, is the comprehension of sources, understanding I guess what makes a primary or a secondary source. Thinking about issues to do with sources such as bias or limitations or where there may be gaps or omissions; thinking about the perspectives. Perspectives is a really important historical skill to understand that there could be different perspectives, different conclusions. And when we see that in history we get the real richness of history and understand it that it’s not just about one particular person’s experience, it’s multiple experiences and we’re all a part of that. In terms of the other skills that history, the new syllabus in history will bring to us are to do with communication. And in particular the language of history using historical terms and concepts. And part of that is understanding there are particular names or ways that we might frame time or a context or a society or when we talk about particular individuals in history. We often use some of that language already. We might talk about the Gold Rush era and we can start to unpack that with more historical terms thinking about some of the things that were happening out on the diggings for example. So, putting those historical terms and concepts is another important part of the historical skills that students will need to engage with.
**Historical skills evident in: The mad minute – the Boffin, the Builder and the Bombardier**

<table>
<thead>
<tr>
<th>Historical skills</th>
<th>Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Comprehension, chronology, terms and concepts</strong></td>
<td>Locates the events in context, explains the timeframe, uses and explains terminology related to the events including ‘the mad minute’. The explanation of the term ‘doing a wallingford’. Clear chronology of events locates Lord Robert’s statement in 1905 that the next war would be with Germany. A description of war with Europe from the 1870s to 1945 is also provided.</td>
</tr>
<tr>
<td><strong>Analysis and use of sources</strong></td>
<td>Uses a variety of sources, both primary and secondary, many from the Hythe School of Musketry in England, to answer a historical question. Uses information from British efforts in the Boer War. No primary source on the Snoxhall ‘record’ for the mad minute. Soldiers name not found on any census when a triangulation of sources was undertaken. Records available to verify the 37 shot record by training officer Wallingford.</td>
</tr>
<tr>
<td><strong>Perspectives and interpretations</strong></td>
<td>British perspective that they were ‘out shot’ in the Boer War. German perspective that they were facing machine guns. The German interpretation on what caused the devastation.</td>
</tr>
<tr>
<td><strong>Empathetic understanding</strong></td>
<td>The consequences of the ‘mad minute’ and concern for the killed and wounded.</td>
</tr>
</tbody>
</table>
| **Research**                                  | Asks the historical question: Was what happened in the early months of the war a success of British training or a failure of German tactics? Historical research found:  
- 1892 treaty between Russia and France that hemmed Germany in.  
- Lord Robert’s statements about the next war.  
- Finding out about the record number of shots in one minute. |
| **Explanation and communication**             | The discussion on the chronology of the war events 1870s to 1945. Discussion on the response to the research question. Revision of initial response from new evidence regarding the ‘record’ of number of shots in a minute. An explanation of the term ‘a wallingford’ based on sources.                                                                                     |
Quality Teaching

Historical concepts and skills provide the teaching and learning context to engage powerfully with elements of quality teaching. By the strategic teaching of historical concepts and skills, teachers will engage students in key elements of the Quality Teaching Model:

- Intellectual quality
- Quality learning environment
- Significance.

The following quality teaching questions can be applied to teaching historical concepts and skills to support students’ knowledge and understanding of history:

- What do you want the students to learn about history?
- Why does the learning of this history matter?
- What are you going to get the students to do to demonstrate historical understandings?
- How well do you want them to know and understand history?

Let’s look at:

*Intellectual quality*: refers to the pedagogy focusing on producing deep understanding of important, substantive concepts, skills and ideas.

*Significance*: refers to pedagogy that helps make learning more relevant to students.

Use the *Quality Teaching in history K-6* worksheet to record responses related to Intellectual quality and Significance.

**Task:**

- Identify and describe the pedagogy that is needed to support this student to engage with the source materials you can see in the photo, to work towards achieving the outcomes
- Reference the concepts and skills continuums to assist in examining the Quality Teaching elements
- Align the key historical concepts and skills to the related Quality Teaching element with reference to the image to examine elements of Quality Teaching to enhance student achievement in history
- Develop further for the stage you are most familiar with teaching.

This table has been partly completed to assist you to cross reference the historical concepts and skills with the elements of Quality Teaching.
## Quality teaching in history K-6

Complete the tables below to explore the relationship between the historical concepts and skills with the Quality Teaching model.

<table>
<thead>
<tr>
<th>Quality teaching element</th>
<th>Quality teaching description of element</th>
<th>Concept or skill examples for Stage 1</th>
<th>Concept or skill examples for another stage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Deep knowledge</td>
<td>Knowledge is deep because focus is on sustained key ideas or concepts throughout the lesson.</td>
<td>Historical skill: Analysis and use of sources. Explores a range of sources of personal and cultural significance.</td>
<td>Historical concept: Change and continuity. Language itself has a history and experiences change and continuity over time.</td>
</tr>
<tr>
<td>Deep understanding</td>
<td>Students demonstrate deep understanding throughout the lesson.</td>
<td>Historical skill: Chronology. Understanding chronology is dependent on the use of appropriate metalanguage to describe events in time.</td>
<td></td>
</tr>
<tr>
<td>Problematic knowledge</td>
<td>Knowledge is seen as socially constructed, with multiple and/or conflicting interpretations presented and explored to an extent that a judgement is made about the appropriateness of an interpretation in a given context.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Higher-order thinking</td>
<td>All students, almost all of the time, demonstrate higher-order thinking.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Metalanguage</td>
<td>High use of metalanguage. The lesson proceeds with frequent commentary on language use.</td>
<td>Historical skill: Comprehension, chronology, terms and concepts. Students need support to understand periods of the past and the range of words that are used to describe them e.g. ‘long ago’ and ‘in olden times’ describes the past; ‘generations’ and ‘decades’ describes the present.</td>
<td>Historical skill: Comprehension, chronology, terms and concepts. Including: • Historical terms e.g. uprising, rebellion, squattocracy, heritage, significance. • Archaic and outmoded language e.g. words for measurement such as mile,</td>
</tr>
</tbody>
</table>
### Intellectual quality analysis

- ‘decades’ describe time spans.
- Archaic prose e.g. *the journal of Sir Joseph Banks.*
- Many students will need assistance when engaging with the language of history.

### Substantive communication
- Substantive communication, with sustained interactions, occurs throughout the lesson, with teachers and/or student scaffolding the communication.

### Significance analysis

<table>
<thead>
<tr>
<th>Quality teaching element</th>
<th>Quality teaching description</th>
<th>Historical skill or concept examples for Stage 1</th>
<th>Historical skill or concept examples or another stage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Background knowledge</td>
<td>Students background knowledge is consistently incorporated into the lesson, and there is substantial connection to out-of-school background knowledge.</td>
<td>Historical skill: Research Ponates questions about the sources with reference to their personal and cultural significance.</td>
<td>Historical concept: Perspectives Students own cultural backgrounds are a significant factor in their interpretation of different points of view of the past in the present.</td>
</tr>
<tr>
<td>Cultural knowledge</td>
<td>Substantial cultural knowledge is recognised and valued throughout the lesson and this knowledge is accepted as equal to the dominant culture.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Knowledge integration</td>
<td>Meaningful connections are regularly made between topics or subject areas by the teacher and/or the students during the lesson.</td>
<td>Historical concept: <em>Cause and effect</em> Identifies and describes some reasons for changes in people’s lives over time due to the impact of technology. Historical skill: <em>Analysis and use of sources</em> Identifies and compares sources from the past and the present.</td>
<td></td>
</tr>

</table>
| **Inclusivity** | Students from all groups are included in all aspects of the lesson and their inclusion is both significant and equivalent to the inclusion of students from other social groups. | **Empathetic understanding**  
Interrogates the sources for evidence that people lived differently in the past. |
| **Connectedness** | Students recognise and explore connections between classroom knowledge and situations outside the classroom in ways that create personal meaning and highlight the significance of the knowledge. This meaning and significance is strong enough to lead students to become involved in an effort to influence an audience beyond the classroom. | **Explanation and communication**  
Teachers develop an historical narrative for students about life in the past.  
Students are supported to develop an historical narrative as a result of engaging with a variety of primary and secondary sources. |
| **Narrative** | Narrative is used throughout the lesson to enhance the significance of the substance of the lesson. |                                                                                  |
The history syllabus in practice

This image is of a Year 1 student engaging with a range of primary sources which provide learning opportunities towards achieving these syllabus outcomes, and the content described in the syllabus below:

- communicates an understanding of change and continuity in family life using appropriate historical terms HT1-1
- describes the effects of changing technology on people’s lives over time HT1-3
- demonstrates skills of historical inquiry and communication HT1-4.

Differences and similarities between students' daily lives and life during their parents' and grandparents' childhoods, including family traditions, leisure time and communications (ACHHK030)

Students:

- represent graphically the structure of their immediate family
- compare and contrast their immediate family with earlier families through photographs and other sources, discussing similarities and differences
- investigate the roles of present family members and compare with the roles of earlier generations using a range of sources
- discuss similarities and differences from generation to generation, e.g. family celebrations and traditions, leisure activities and changes in technology/communications over time through a range of sources
- compare and contrast daily life with that of parents and grandparents at the same age through stories or photographs and pose questions to ask parents/grandparents.
Stage 2 description of learning
Explore the sample Stage 2 description of learning on the syllabus topic Community and Remembrance. Examine how the historical concepts and skills are supported by a variety of teaching strategies.

What aspects of this learning do you need to adapt to enhance the learning outcomes for your students, with reference to the historical concepts, skills and the Quality Teaching model?

Community and remembrance
This topic provides a study of identity and diversity in both a local and broader context. Moving from the heritage of their local area, students explore the historical features and diversity of their community. They examine local, state and national symbols and emblems of significance, and celebrations and commemorations, locally and in other places around the world.

The following historical concepts are to be taught throughout Stage 2:
Continuity and change: some things change over time and others remain the same, e.g. aspects in the local community that have either changed or remained the same; changes to the lives of Aboriginal peoples with the arrival of the First Fleet.

Cause and effect: events, decisions or developments in the past that produce later actions, results or effects, e.g. how conditions and decisions in Britain resulted in the journey of the First Fleet; causes of change in the local area/state.

Perspectives: people from the past will have different views and experiences, e.g. views on the arrival of the British in Australia from a British and an Aboriginal point of view.

Empathetic understanding: developing an understanding of another's views, life and decisions made, e.g. developing an understanding of the life and attitudes of an early colonist or convict.

Significance: importance of an event, development or individual/group, e.g. the significance or importance of national days/holidays; the significance of the contributions of an early settler.

The following historical skills are to be taught throughout Stage 2:
Comprehension: chronology, terms and concepts
respond, read and write, to show understanding of historical matters, sequence familiar people and events (ACHHS065, ACHHS081), use historical terms (ACHHS066, ACHHS082)
Analysis and use of sources
locate relevant information from sources provided (ACHHS068, ACHHS084, ACHHS215, ACHHS216)

Perspectives and interpretations
identify different points of view within an historical context (ACHHS069, ACHHS085)

Empathetic understanding
explain how and why people in the past may have lived and behaved differently from today

Research
pose a range of questions about the past (ACHHS067, ACHHS083), plan an historical inquiry

Explanation and communication
develop texts, particularly narratives (ACHHS070, ACHHS086), use a range of communication forms (oral, graphic, written) and digital technologies (ACHHS071, ACHHS087)

Outcomes
A student:
- identifies celebrations and commemorations of significance in Australia and the world HT2-1
- describes and explains how significant individuals, groups and events contributed to changes in the local community over time HT2-2
- applies skills of historical inquiry and communication HT2-5

Key inquiry questions:
- Who lived here first and how do we know?
- How has our community changed? What features have been lost and what features have been retained?
- What is the nature of the contribution made by different groups and individuals in the community?
- How and why do people choose to remember significant events of the past?

The example outlined below provides a model that can be adapted to variety of content organisers, around aspects of daily life, work, education, transport or entertainment to reflect the schools location and links with the local and wider community to support student engagement.

**Syllabus content**

Use a range of literacy skills to interrogate the sources, such as who is the audience, who is this information intended to be used by, is it primary or secondary, and how do you know, what other information is now needed to make sense of the era(s).

**Empathetic understanding:**
Based on the information across a range of sources explain why people in the past lived and behaved differently (or still the same) as today.

**Research:**
Identify sources, develop a plan to undertake the inquiry around the inquiry questions, cull unnecessary sources and identify source gaps to complete the research.

**Explanation and communication:**
Develop the historical narrative, orally at first, then determine the strategies students will use to convey their understandings of the historical inquiry.

---

**Teaching and learning ideas**

- **change over time**
  - open-ended stories that are used to explore ‘what if’ scenarios based on the sources and evidence students have engaged with.

---

**Assessment for, as and of learning**

The syllabus outcomes are the statements of intended learning providing descriptions of standards against which decisions are made about students’ learning.

Use a variety of assessment strategies including teacher observations, a range of peer and self assessment and collaborative activities as processes for collecting and interpreting information about students’ learning. A range of assessment strategies supporting the historical skills descriptions for explanation and communication.

These can include:

- strategic (oral) questioning to determine understanding
- discussions, debate and role play
- media presentations e.g. new bulletin, podcast, video with commentary
- blog comments
- storyboard reports
- poster or presentation
- diary or learning journal
- student self-reflection and evaluations
- planning a historical inquiry
- a variety of written responses
- use of historical terms.

Sources  
The following sources are examples of evidence that can be analysed to support the historical inquiry.  
Use the links in [HSIE K-6 Pinterest](http://tropicpour.com)  
Search [Trove](http://tropicpour.com) (National Library of Australia) using key words, such as local place names, family names, events and dates to identify source material that can be used by students  
Search the ‘tag cloud’ of key words from [Screen Australia](http://tropicpour.com) to identify time audio visual resources that are relevant to the inquiry. The tag cloud also includes decades, as a way of identifying audio visual resources related to a specific time.  
Background information for teachers on the history of beach going and swimming in Australia

Professional reflection

Throughout this resource, you have looked at:

- developing a common understanding and metalanguage for the historical inquiry process
- identifying the importance of key inquiry questions
- constructing an historical inquiry in the primary classroom
- becoming familiar with teaching ideas which support historical inquiry.

Reflecting on historical inquiry

Historical inquiry is an active process which enables students to question, analyse, interpret, explain and communicate their understanding of the past. Exposure to valid interpretations and perspectives using sound evidence gathered from primary and secondary sources enhances the investigative process.

Additional resources

Work towards developing students’ understanding of the historical inquiry process using a number of useful links below to help you get started:
